

PROJECT SHOWCASE

AI Data Analyst

Ask questions about a CSV in plain English — and receive charts and concise explanations.

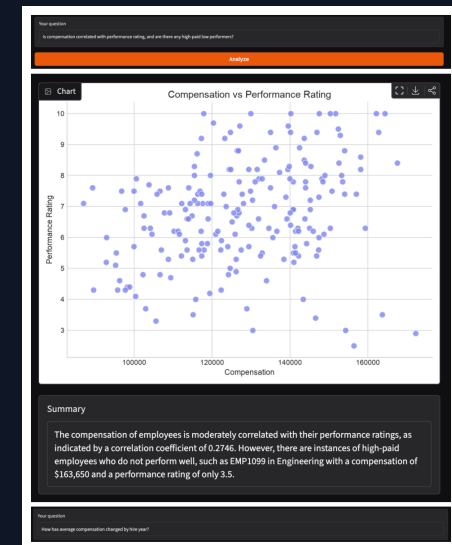

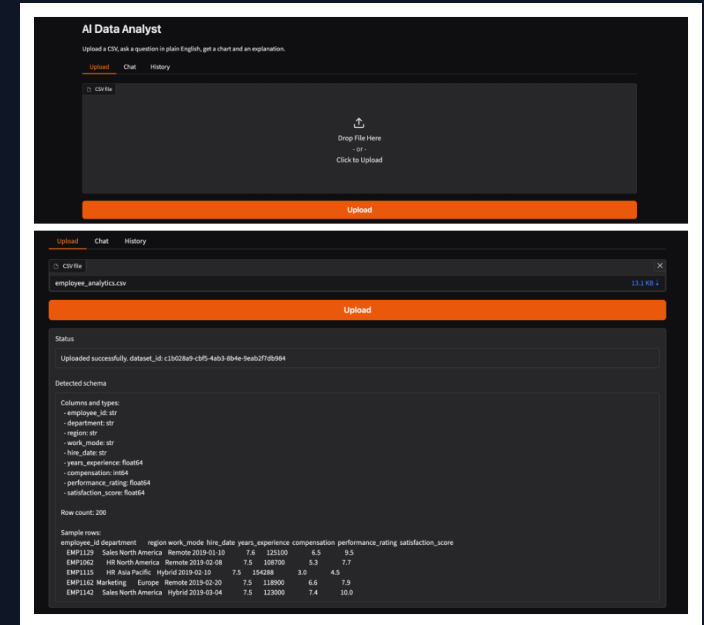

CSV upload

Natural-language questions

Charts + summaries

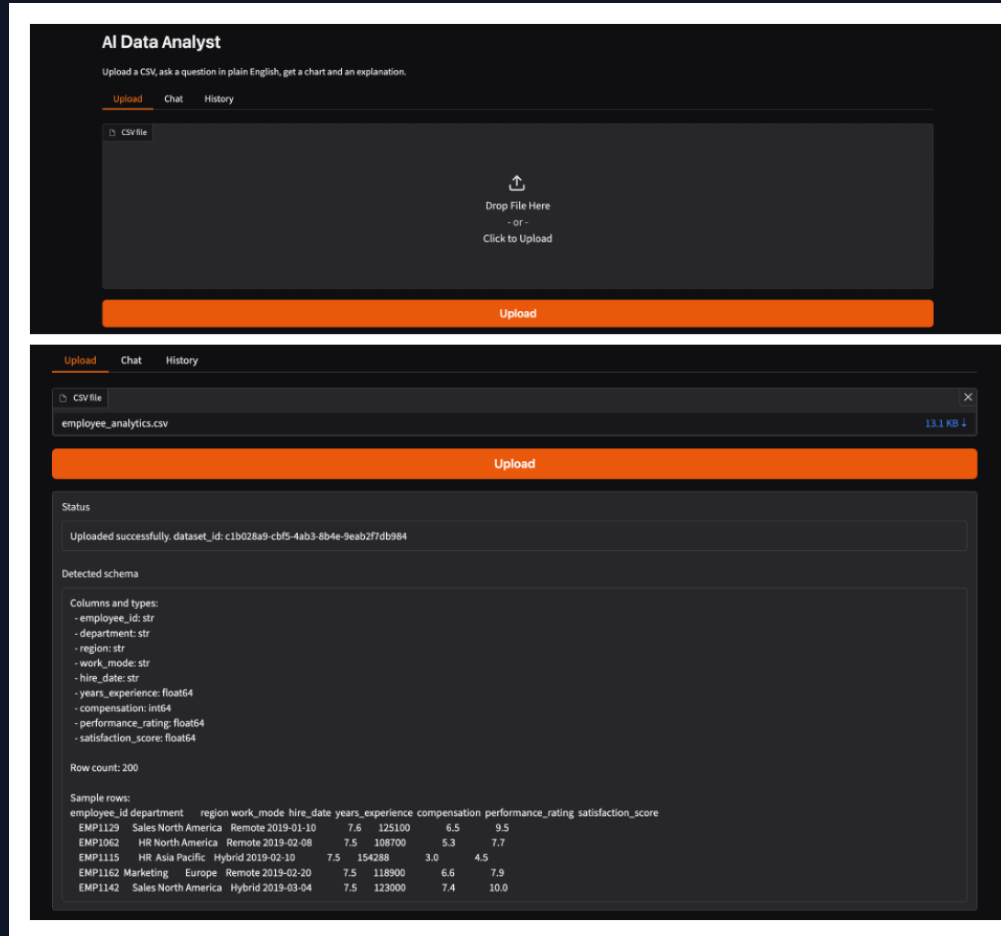

A polished visual walkthrough of the project interface and its analysis outputs.

GitHub-ready PDF

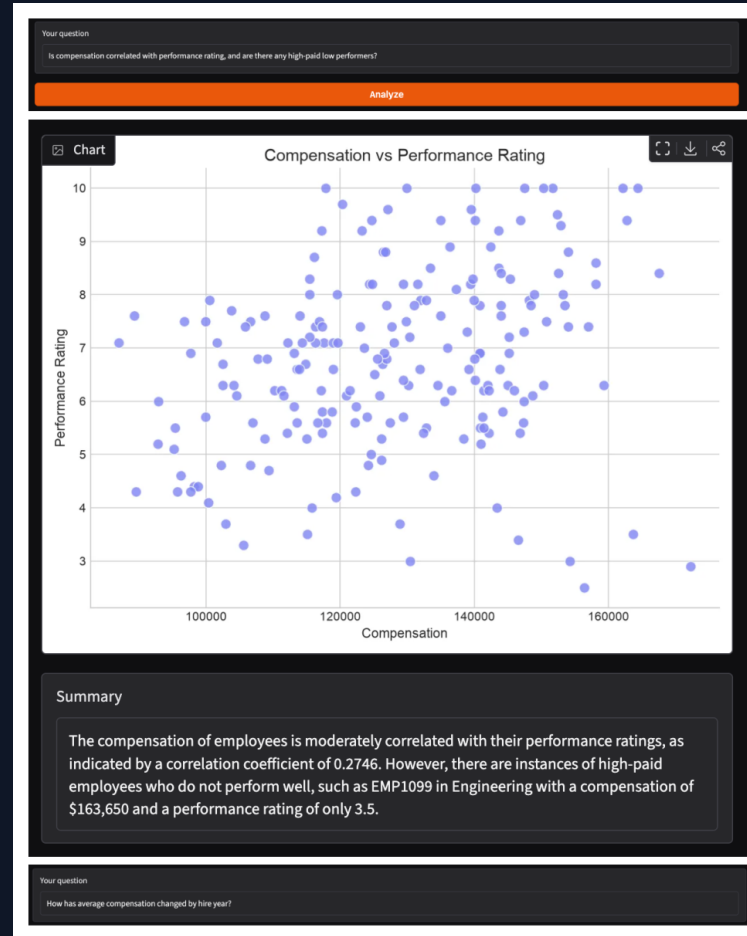

Upload & inspect the dataset

The interface accepts a CSV, confirms the upload, detects the schema, and previews sample rows.

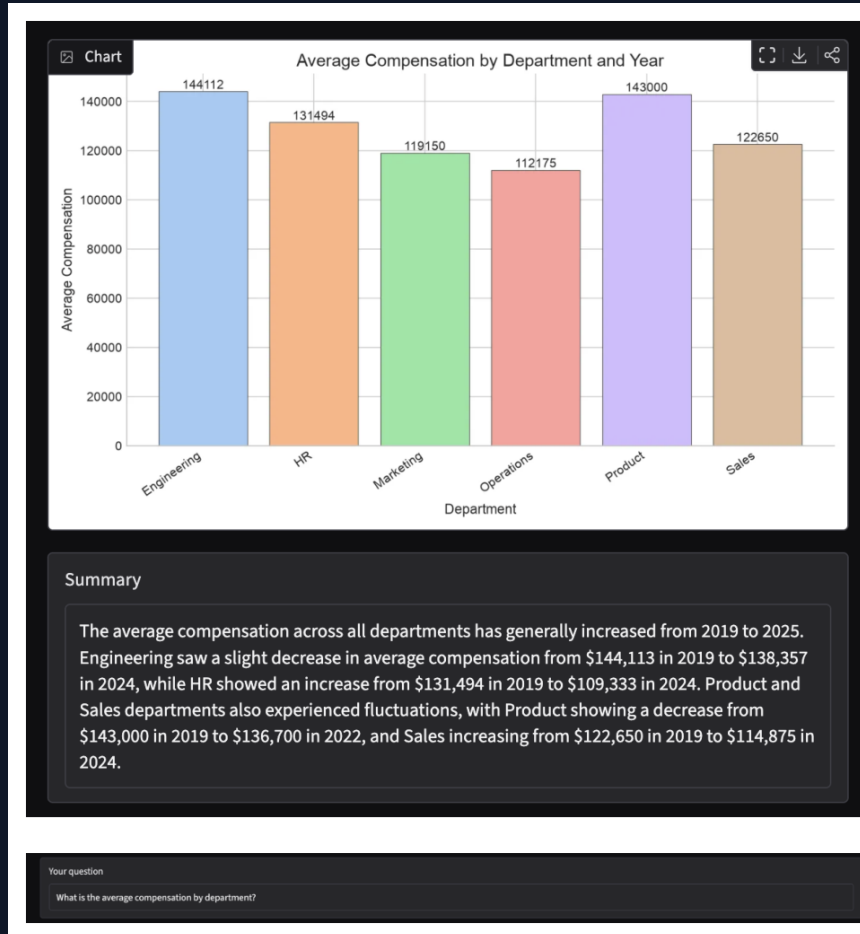

Turn a question into an analysis

A natural-language question is submitted and the project returns a visualization with an explanatory summary.

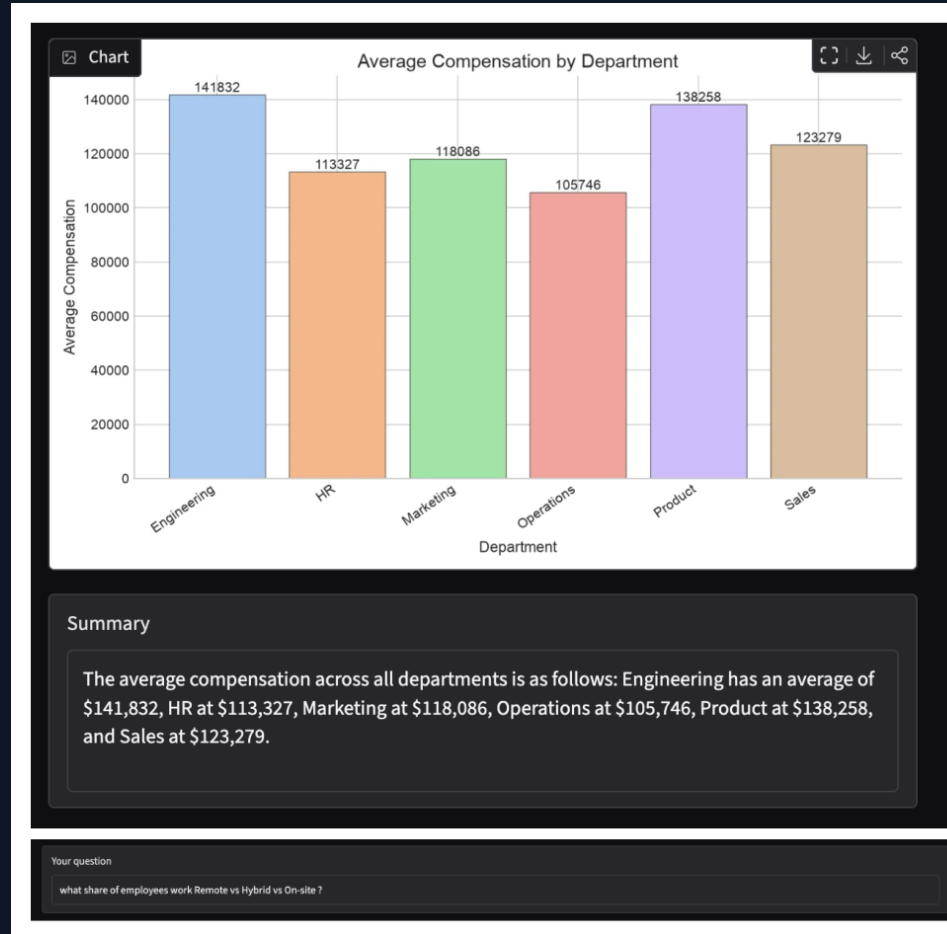

Explore compensation patterns

The project surfaces department and year-level compensation patterns through a chart and written interpretation.

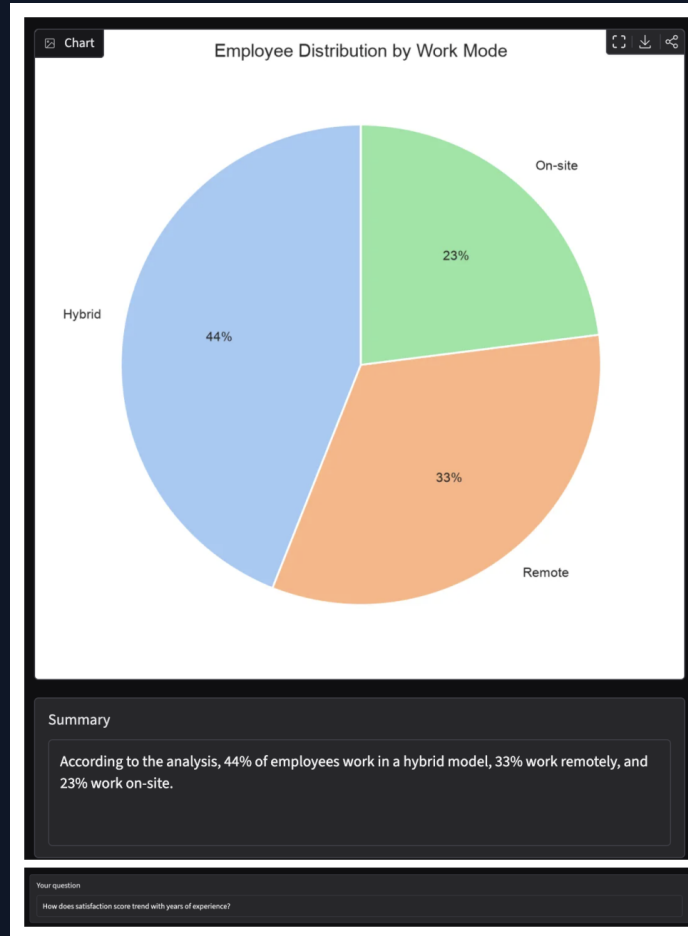

Compare departments

A department-level view makes compensation differences easy to scan and interpret.

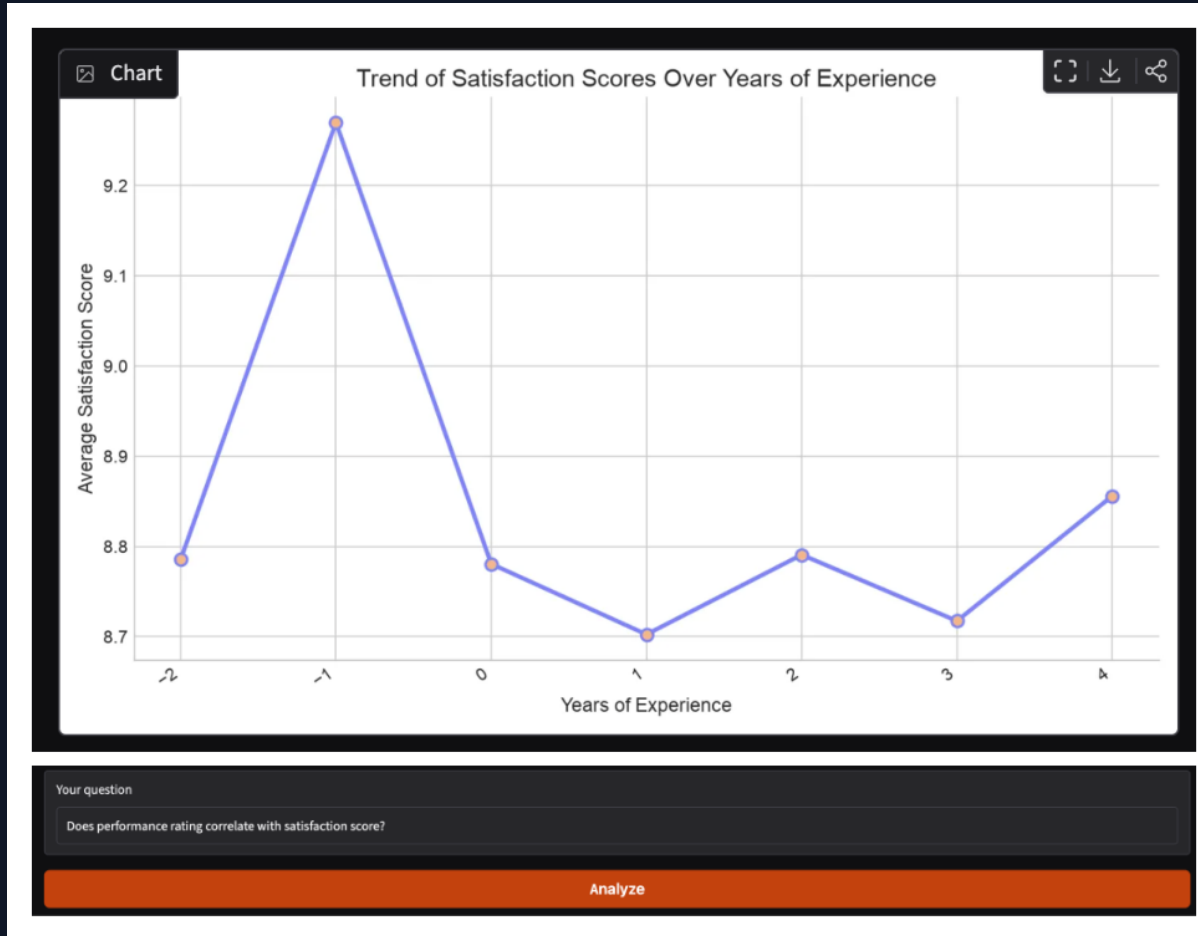

Understand work-mode distribution

The analysis visualizes how employees are distributed across on-site, remote, and hybrid work modes.

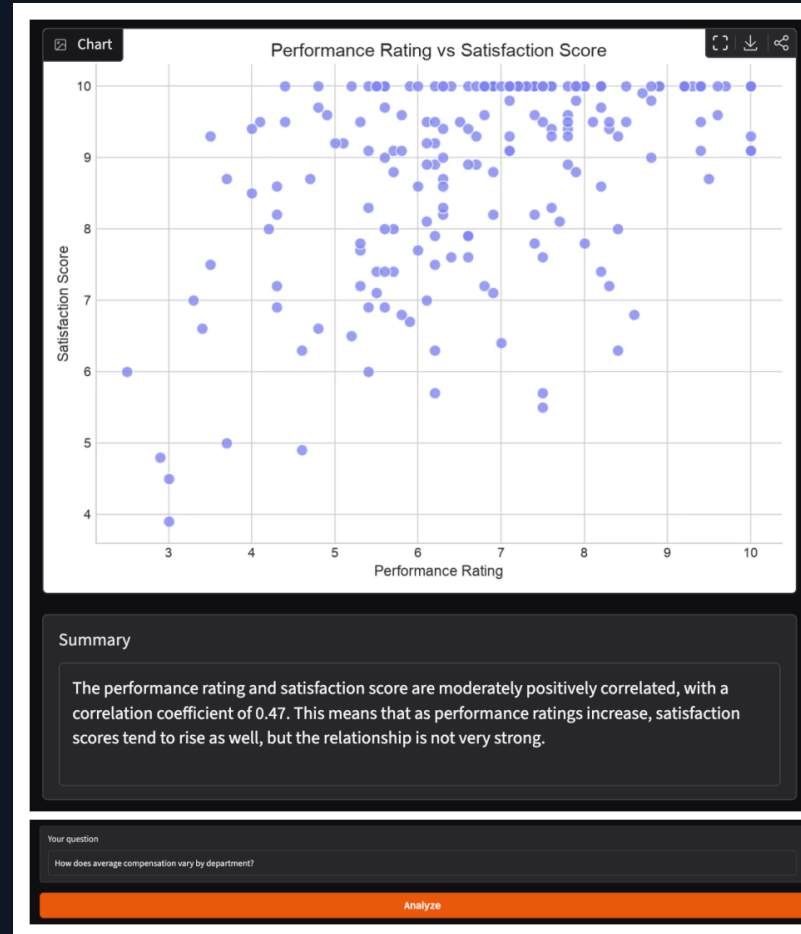

Explore satisfaction across experience

The project plots satisfaction trends against years of experience and provides an accompanying analysis prompt.

Connect performance and satisfaction

A scatter plot helps examine the relationship between performance rating and satisfaction score.

A compact, decision-ready view

The final analysis output presents department compensation comparisons with a concise written takeaway.
